Roto - Prep - Compositor

## Summary

I am a recent graduate from the university of Hertfordshire currently working as a Roto artist at Touch Surgery. I consider myself to be very hard working, dedicated and determined who works well in a team and loves a challenge. Both working at Touch Surgery and my degree have prepared me for this role as a roto/prep artist because we completed projects by working in groups using the same role specifications and techniques as the VFX industry; and creating a pipeline similar to industry. With a few less moving parts obviously. This allowed communication and work tasks to function mirroring industry standards. This allowed me to specialise in roto, prep/paint and compositing during my final year and hone all my skills in this area, however I pride myself in continually looking to feather my skills and learn the newest most efficient techniques. This along with paying close attention to every detail are our main goals as an artist.

## Skills

**Technical skills:** Roto in Silhouette or nuke/ paint out people and moving objects/ paint out tracking markers: green screen and non greenscreen/ paint out face markers/ plate fixes/costume fixes.

**Soft skills:** Determined / great communication skills / punctual / reliable / strong work ethic / great team work skills.

## Software

I primarily use Nuke, Silhouette, Maya and Arnold but also have experience in Maya, Arnold, Mocha, Mari, Substance, Photoshop, Resolve, Final Cut Pro, Fusion, Natron, Premiere Pro
